CS 191 Workshop V - Use Case Specifications

Objective:
- To do the Use Case Specifications of the Use Case Model

Instructions:

1. Use the document template, 1.3 Use Case Specification Document (version 1.1).odt found [here](#).   You should have one document per use case as specified in the use case model of your project. So, if you have 6 use cases defined in the use case model, you will have 6 documents for the use case specifications. Each team member should elaborate on an equitable number of use cases. 5% is deducted for each day late until the 6th day. After the 6th day, you will get a zero for the deliverable.

2. Save the document(s) as PDF file with the following filename format:

<Use Case No.> - <Use Case Specification Name>.pdf

3. Upload the document(s) to your project's github directory under the 01-Requirements Engineering folder.

Assessment:

- Your Use Case Model will be assessed based on the Use Case Specification Validation Checklist found in the JEDI-Software Engineering Student's Manual on Page 81.

- Deadline: September 30, 2016 at 1:00pm Manila Time.
